

Executive Summary

Karan Chordia is a Bengaluru-based tech enthusiast who has built a portfolio as a **content creator and AI-focused consultant** ¹ ². His own profile describes him as a “Self Taught Filmmaker” and “Digital Entrepreneur” with a passion for storytelling ² ¹. From 2016–2022 he worked freelance on photography, videography and digital marketing projects ³, positioning himself as a “content director” for global brands ¹. Today he emphasizes an **AI-driven skillset** (prompt engineering, AI architecture, generative AI, etc.) alongside his video/creative skills ⁴. His public footprint (YouTube channel, Medium profile, Instagram) shows a focus on tech and storytelling. Key strengths visible in public sources include **multimedia storytelling** and early AI expertise ¹ ⁴. He also presents credibility signals like a listing as a trusted video editing professional in Bangalore ⁵ and a recent consulting role at Nexocean ⁶.

Timeline

- **2016 – 2017:** Began as a **Freelance photographer/videographer** and took a digital marketing role (Web Marketing Academy) ³. This marks his entry into content and media services.
- **Aug 2017:** Established base at WeWork Galaxy in Bengaluru. Public listings show his office address at *WeWork Galaxy, Residency Road* ⁷, and from Aug 2017 he labels himself “Content Director (Freelance)” ⁸. Around this time he launched his **HowDramaTech** YouTube channel (joined Aug 20, 2017, ~1.05K subs).
- **2017 – Dec 2022:** Worked as a freelance content creator and consultant for various clients. He bills projects under his personal brand (HowDramaTech) and lists service packages on his site ⁹. He continued producing videos (e.g. co-working space vlogs) through ~2019.
- **2020 – 2021:** Activity dipped. Public channels show little new content after 2020. (User notes a break from YouTube, consistent with no new uploads.)
- **Mar 2023:** Transition to AI focus. His site lists a new role – “AI Architect, Aimpact Space (Mar 2023–Present)” ¹⁰. This indicates a pivot to AI strategy and tool-building.
- **Aug 2025:** Launch of an AI project. The “Aimpact Space” portfolio on Blink.ai shows he created an AI-driven web app in August 2025 ¹¹.
- **2025 – Present:** Joined Nexocean. LinkedIn lists Karan Chordia as an employee of **Nexocean**, a Bengaluru-based workforce consulting firm ⁶. This suggests his current consulting work is linked to that company.

Public Footprint

- **Personal Website:** He runs a one-page portfolio (karan.pop.site) summarizing his bio, resume, services and skills. It labels him “AI Content Creator & Tech Innovator” and outlines his career timeline, services, and skills ¹ ⁸. This site provides a key public summary of his background.
- **YouTube:** Channel “**HowDramaTech**” (1.05K subscribers) features his work (city vlogs, co-working tours, tech demos). The channel branding (“Self Taught Filmmaker...”) matches his self-description ². (We could not retrieve the video content directly, but search results show he documented WeWork openings and similar events.)

- **Instagram:** Public profile **@karanchordia** (~14K followers). The Instagram tagline (“I don't think inside the box...”) echoes his creative persona (though details couldn't be scraped directly). It's a general personal feed (tech and lifestyle).
- **Medium:** He writes under **karanchordia**. His Medium profile (18 followers) calls him “Self Taught Filmmaker... YouTuber, Blogger, Digital Entrepreneur” ², linking to his personal site. This public presence reinforces his storytelling/tech identity.
- **Business Listings:** A Justdial listing for “Karan Chordia” advertises **Video Editing and Photography** services from WeWork Galaxy, Bangalore ⁷. It calls him a “trusted name in video editing services” ⁵. This independent directory entry corroborates his freelance business and Bengaluru location.
- **Social Mentions:** We found third-party credits of HowDramaTech work (e.g. video credit on a cultural event), indicating he has done client projects (though specific clients beyond “video editing services” aren't named in accessible sources).
- **Company Pages:** On LinkedIn, Nexoceen's company profile lists Karan Chordia as an employee ⁶. (No LinkedIn profile was accessible, but the company page confirms he joined Nexoceen.)
- **Portfolio / Projects:** On **Blink.ai**, an AI-development platform, an “Aimpact Space” profile shows he built an AI app in Aug 2025 ¹¹. This is a public trace of his AI work.

HowDramaTech Research

“**HowDramaTech**” appears to be Karan's personal creative brand rather than a separate corporation. It shows up on his YouTube channel and in project credits, but we found **no dedicated company website or active social account** for it. (For example, “HowDramaTech.com” is not registered.) The branding leans on Karan's persona: his Medium profile and site use personal identity, and he identifies as a filmmaker/storyteller ². The services he offers (as listed on his site) span video production and content strategy along with AI integration ⁹, suggesting HowDramaTech's positioning was “tech-driven storytelling.” We saw evidence of audience engagement (e.g. thousands of views on workspace vlogs) and client work (e.g. event videos credited to HowDramaTech), but all under that personal brand umbrella. In summary, HowDramaTech is Karan's **freelance/SME brand** for content and tech services, with public traces mainly on YouTube and his portfolio – no distinct corporate footprint was found.

Professional Positioning Analysis

Karan's **skill set** spans both creative media and AI. His public profiles list **storyboarding, cinematography, Final Cut Pro X, and content strategy**, alongside **prompt engineering and AI architecture** ⁴. This mix suggests his strongest clusters are **multimedia storytelling** and **cutting-edge AI tech**. He likely positions himself as a hybrid creative-tech specialist. His differentiation lies in combining filmmaking roots with AI (few content creators emphasize prompt engineering or chatbots). He also claims experience as a “**content director for global brands**” ¹, which, if accurate, is a credibility signal – though we found no high-profile brand names to verify. Independent cues (Justdial listing calling him “trusted” ⁵, his presence on consulting platforms) show some standing in local media circles. Weaknesses or gaps in the public record include a lack of stable traditional employment (mostly freelance), an apparent hiatus after 2020, and no large-scale portfolio beyond YouTube metrics. His educational background (“dropped out of a degree” ¹) may concern some clients looking for formal credentials. Overall, Karan's public image is **tech-savvy storyteller**: he highlights narrative creativity but now pushes a new narrative around AI strategy and tools.

New Company Naming Suggestions

1. **Shrishti Labs** – (*Shrishti* = “creation” in Sanskrit). Conveys creativity and innovation. *Tone*: Creative/ visionary. *Category*: Hybrid (creative + tech).
2. **KathaAI** – (*Katha* = “story”). Focuses on storytelling with AI. *Tone*: Creative, content-first. *Category*: Content-driven AI agency.
3. **BodhiTech** – (*Bodhi* = “enlightenment”). Implies wisdom and AI insights. *Tone*: Professional, premium. *Category*: Tech-first AI consultancy.
4. **MantraMatrix** – Combines *Mantra* (formula, wisdom) with a modern edge. *Tone*: Innovative, hybrid. *Category*: Tech/creative consulting.
5. **ChakraFlow** – *Chakra* (energy center) suggests dynamic processes. *Tone*: Modern, energetic. *Category*: Hybrid (tech + creative).
6. **SangamAI** – *Sangam* = “confluence”. Denotes blending of ideas (AI + content). *Tone*: Professional, collaborative. *Category*: Hybrid.
7. **SutraLogic** – *Sutra* = “thread/principle”. Suggests structured methodology. *Tone*: Analytical, credible. *Category*: Tech-first (AI strategy).
8. **PraatibhaAI** – *Praatibha* = “talent” or “creative spark”. Emphasizes creative ability. *Tone*: Artistic, content-first. *Category*: Content-centric.
9. **AnantVision** – *Anant* = “infinite”. Implies limitless innovation. *Tone*: Bold, tech-savvy. *Category*: Tech-first.
10. **AIKosha** – *Kosha* = “layer/knowledge sheath”. Combines “AI” to highlight expertise. *Tone*: Technical, modern. *Category*: Tech-first.
11. **Pratiman Labs** – *Pratiman* = “image/representation”. Reflects visual storytelling. *Tone*: Creative, authoritative. *Category*: Hybrid (tech + video).
12. **TarangAI** – *Tarang* = “wave”. Suggests dynamic AI-driven change. *Tone*: Fresh, hybrid. *Category*: Hybrid.
13. **Nexus Mantra** – *Nexus* = connection, *Mantra* = guiding principle. Suggests linking ideas with strategy. *Tone*: Innovative, strategic. *Category*: Hybrid.
14. **Aranya Insights** – *Aranya* = “forest”. Implies depth and exploration. *Tone*: Thoughtful, premium. *Category*: Hybrid/consulting.
15. **DishaAI** – *Disha* = “direction”. Conveys guidance in AI adoption. *Tone*: Professional, dependable. *Category*: Tech-first.
16. **Anika Strategies** – *Anika* = “grace, brilliance”. Emphasizes elegance in solution design. *Tone*: Creative, approachable. *Category*: Content-first.
17. **Samvid Tech** – *Samvid* = “knowledge”. Implies smart tech solutions. *Tone*: Cutting-edge, tech-first. *Category*: Tech-driven.
18. **Yukti Media** – *Yukti* = “strategy, clever approach”. Suitable for media/AI strategy. *Tone*: Modern, confident. *Category*: Content/consulting hybrid.
19. **Sparsha Tech** – *Sparsha* = “touch”. Conveys human-centric tech. *Tone*: Warm, innovative. *Category*: Hybrid.
20. **Pragati Dynamics** – *Pragati* = “progress”. Suggests growth and movement. *Tone*: Premium, forward-looking. *Category*: Tech-first.

Each name blends Indian cultural elements (language or concepts) with a modern tech vibe. For example, **KathaAI** is storytelling-focused (content-first), while **BodhiTech** and **Samvid Tech** lean tech-first. Names like **MantraMatrix** or **SutraLogic** signal a hybrid (creative-tech) focus. We’d evaluate each name’s feel – some sound more “creative,” others more “technical” – to match the desired brand tone.

Brand Direction Recommendations

Based on this research, Karan should position his new company as an **AI-powered creative studio/consultancy**. He can emphasize his unique blend of tech and storytelling: e.g. *"we bring AI-driven innovation to your brand's narrative."* For services, packaging should mirror what his portfolio suggests: tiered "AI Strategy" and "AI Integration" projects (as he already lists, ~₹35K each ⁹), plus richer content bundles ("Brand Kit / Video Production" ~₹45K ¹²). He might offer a retainer or subscription for ongoing content + AI management (bundling the ₹50K "Content Director" package ¹³). Ideal customers are **tech-savvy startups and brands** wanting modern content marketing, especially those in Bengaluru's startup/SME ecosystem and beyond. The positioning statement could be: *"We are an AI-first creative partner that crafts high-impact content and automation strategies."* A brand narrative might highlight Karan's journey: a **self-taught filmmaker turned AI innovator** who bridges creativity and technology. He can story-tell how he grew up on cartoons and built video campaigns, and now uses that passion to help clients leverage AI tools for storytelling. For example: *"From the co-working corridors of WeWork to the cutting-edge of AI, I've learned that great stories powered by smart tech drive results. We build those stories for your brand."* In essence, the company should market itself as a **premium boutique consulting studio** – modern and credible – that leverages Indian ingenuity (a nod to names like *Sutra* or *Samvid*) in delivering global-standard AI and content solutions.
